INTRODUCCION

En 1970, la Biblioteca y Servicio de Documentación del IICA publicó, en cooperación con la Oficina del Café y el Ministerio de Agricultura y Ganadería de Costa Rica, la primera edición de esta obra, como un componente indispensable de un programa de acción contra la amenaza de la roya del café, y en respuesta a una recomendación del Comité Técnico Consultivo de la Comisión Internacional Regional de Sanidad Agropecuaria (CIRSA).

Esta segunda edición de la bibliografía representa un esfuerzo del Centro Interamericano de Documentación e Información Agrícola, IICA-CIDIA para proveer, a los programas y especialistas en café de los países del continente, de un instrumento actualizado que sirva de base a la lucha contra la introducción y propagación de esta enfermedad que amenaza, con consecuencias funestas, la economía de los países productores de café. Esta obra es también un intento para fomentar la cooperación y el intercambio científico entre los especialistas de la región.

La bibliografía es de carácter exhaustivo e incluye documentos publicados a principios de 1973. Contiene 1.438 referencias bibliográficas organizadas en base a un esquema de clasificación diseñado especialmente para atender aspectos específicos de la enfermedad. Al final se provee un índice alfabético de autores.

El IICA-CIDIA facilita el acceso a la mayor parte de los documentos incluidos en esta bibliografía, a través de su Servicio de Reproducción de Documentos.

En la preparación de este trabajo han colaborado varios especialistas por lo que deseamos expresar nuestros agradecimientos a los Drs. Geraldo Martins Chaves y C. J. Rodrigues Junior, por el envío de información bibliográfica; también al Dr. Pierre G. Sylvain, por su apoyo y asesoramiento técnico.
