

# Caribbean Climate Responsive Agriculture Forum (CCRAF)

Part 1  
August 19, 2021

**Guest Speaker:** Dr. Gregory Gouveia

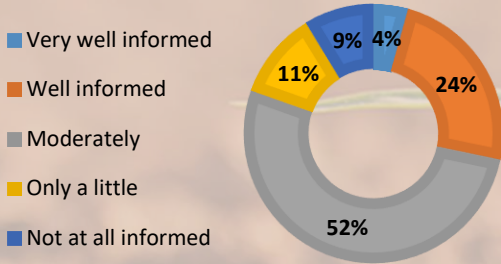

**Objective:** To raise awareness on key soil and water management issues in the face of climate change and the practical adaptation and mitigation approaches that can be implemented.

## Practical Solutions for On-Farm Management of Soil and Water

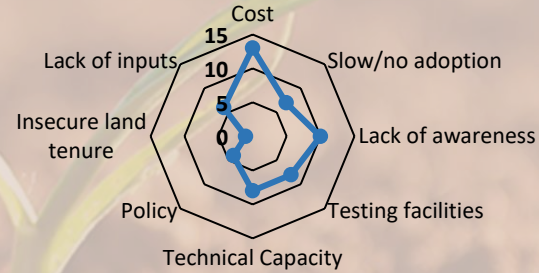

### Baseline Poll

How informed do you feel about on-farm soil and water management?

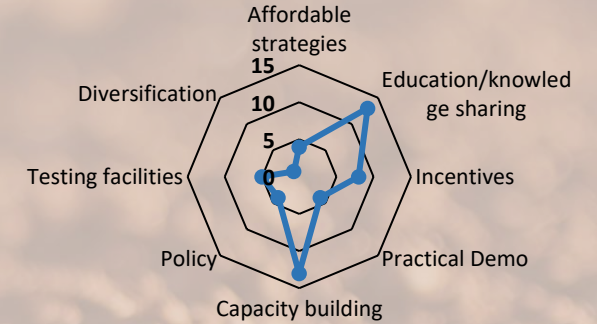

### Breakout Groups Dialogue

Barriers hindering the adoption and implementation of on-farm soil and water management strategies

Actions that can be taken to address these barriers

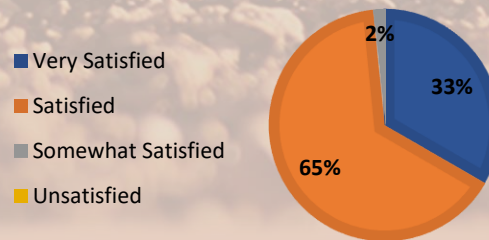

### Feedback Poll

Do you feel better informed about on-farm soil and water management?

How satisfied were you with the forum?

What components of the training do you feel can be improved?
