

# Caribbean Climate Responsive Agriculture Forum (CCRAF)

Part 4

November 14, 2021

**Guest Speaker:** Mr. Dean Avril

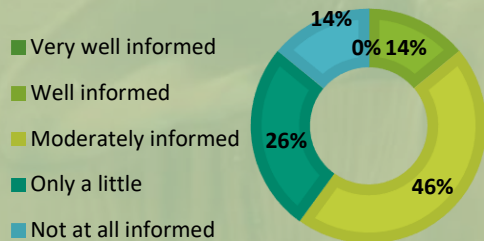

**Objective:** To raise awareness of the key livestock production issues in the face of climate change and the practical adaptation and mitigation approaches that can be implemented.

## Use of High Quality Forages to Build Climate Resilient Livestock Production Systems

### Baseline Poll

How informed do you feel about the use of high-quality forage in livestock production?

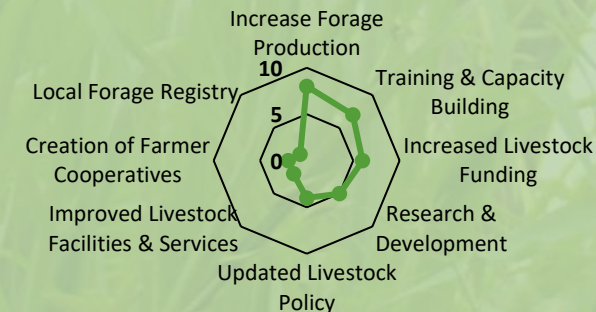

### Breakout Groups Dialogue

Barriers hindering livestock production

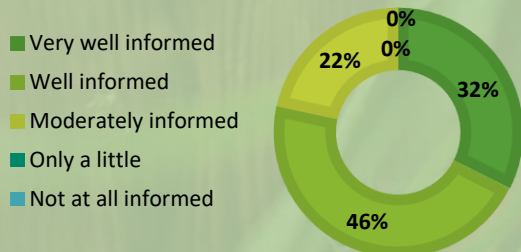

Actions that can be taken to address these barriers

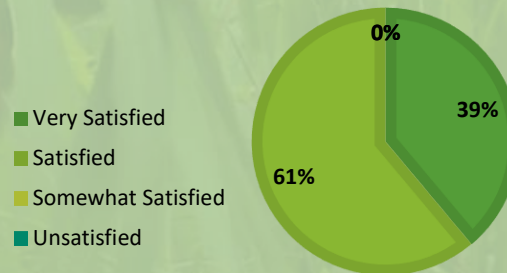

### Feedback Poll

Do you feel better informed about Using Climate Data in on-farm decision-making to Increase Agriculture Yields?

How satisfied were you with the forum?

What components of the Forum do you feel can be improved?
