To Scan QR Code**

# A Knowledge-to-Action Framework

## The Network...

## Objectives

1. **Raise awareness** and share knowledge of climate smart agricultural practices and options for the Caribbean region
2. **Build a community** of interested and engaged actors at the regional and national levels
3. **Promote enhanced coordination** and collaboration among stakeholders across the region
4. **Translate technical knowledge to practical action on the ground**

# TODAY'S

# Schedule

August 21, 2024

## Introduction

Mrs. Nekelia Gregoire Carai

## Presentation

Mr. Damian Adjodha

## Open Discussion

Participants

## Wrap-Up

Mrs. Nekelia Gregoire Carai

# Nature-based Solutions (NbS) for Soil & Water Management

## Presenter

**Mr. Damian Adjodha**  
*Agroecosystems Director  
New-Flower Regenerative  
Garden (NRG)  
St. Lucia*

## Mr. Adjodha will Share Practical Information on:

- Biointensive Planting Techniques to Intensify Soil Micro-Biome
- Regenerative Methods to Improve Soil Health and Function.
- Agroecological System Strategies to Maximize Utilization of Sun, Soil, and Water Resources.

# CERTIFICATE OF PARTICIPATION

CCRAF 2024 SERIES EDITION

We Proudly Certify that

*Marceline Anderson*

Participated in the CCRAF 2024 Three-Part Series Edition on Optimizing Fertilizer Use Efficiency for Crop Production, Nature-based Solutions for Soil & Water Management, and Data-Driven Farm Decisions for Enhancing Productivity & Livelihoods held on July 17, August 21, and September 19, 2024.

**Mrs. Nekelia Gregoire Carai**

Technical Specialist in Water & Soil  
Coordinator of the CCRAF  
IICA

**Dr. Chaney St. Martin**

International Specialist in  
Water & Soil Management  
IICA
