INTRODUCCION

Fue a principios del presente año que la "Roya del Café" - (Hemileia vastatrix B. et Br.) dejó de ser una enfermedad exótica para el Continente Americano. En enero de 1970, el Ingeniero Agrónomo Arnaldo Gómez Medeiros, fitopatólogo del Centro de Pesquisas do Cacau (CEPLAC) la encontró accidentalmente en una plantación mixta de café y cacao en el Estado de Bahía, Brasil.

Tal noticia, conmovió el ambiente cafetalero mundial y muy especialmente al americano.

La amenaza de la Roya del Café, alcanza caracteres alarmantes en Brasil y es motivo de verdadera preocupación para el resto de los países productores de nuestro Continente.

A nivel Centroamericano una de las primeras y más significativa de las medidas fue provocar una reunión de emergencia del Comité Técnico Consultivo de la Comisión Internacional Regional de Sanidad Agropacuaria (CIRSA), con el objeto de proponer, discutir, analizar y ejecutar una importante serie de medidas, todas ellas dirigidas a prevenir la introducción de la Roya, a los países del área.

Tal reunión tuvo lugar en San José, Costa Rica, en los días - 10, 11 y 12 de marzo de 1970.

La resolución número 21, tomada en este importante evento establece lo siguiente:

"Solicitar al Instituto Interamericano de Ciencias Agrícolas de la Organización de Estados Americanos, su colaboración, para la obtención y publicación de una bibliografía, hasta el momento, sobre la Roya del Café".

En cumplimiento de tal mandato, es que se ha producido el presente documento, el cual ha sido posible prepararlo en tan corto tiempo, gracias al auspicio de la Oficina del Café y del Ministerio de Agricultura y Ganadería de Costa Rica, y al conocimiento, dedicación, esfuerzo e interés de personas como el Lic. Hugo Cáceres, el Dr. Pierre Sylvain, la Srta. María Dolores Malugani, y la Señora Margarita C. de Bonilla, miembros del personal del IICA.

Esta bibliografía no pretende ser, en manera alguna, un trabajo exhaustivo. No obstante, en su compilación se ha consultado la mayor parte de las fuentes bibliográficas sobre café, especialmente el trabajo "An Annotated Bibliography of Coffee Rust (Hemileia spp.) publicado por J. A. Stevenson y Rose Bean, en 1953.

Este documento, por la información que contiene y por la procedencia de la misma, ha de ser, sin duda alguna, de gran valor en nuestra lucha contra la Roya del Café.

San José, Costa Rica,
Junio de 1970

Ing. Gilberto Gutiérrez Z.
Jefe, Departamento de In-
vestigaciones en Café
Ministerio de Agricultura
y Ganadería
