¿QUE ES EL IICA?

El Instituto Interamericano de Cooperación para la Agricultura (IICA) es el organismo especializado en agricultura del Sistema Interamericano. Sus orígenes se remontan al 7 de octubre de 1942 cuando el Consejo Directivo de la Unión Panamericana aprobó la creación del Instituto Interamericano de Ciencias Agrícolas.

Fundado como una institución de investigación agronómica y de enseñanza de posgrado para los trópicos, el IICA, respondiendo a los cambios y a las nuevas necesidades del Hemisferio, se convirtió progresivamente en un organismo de cooperación técnica y fortalecimiento institucional en el campo agropecuario. Estas transformaciones fueron reconocidas formalmente con la ratificación, el 8 de diciembre de 1980, de una nueva convención, la cual estableció como los fines del IICA los de estimular, promover y apoyar los lazos de cooperación entre sus 32 Estados Miembros para lograr el desarrollo agrícola y el bienestar rural.

Con un mandato amplio y flexible y con una estructura que permite la participación directa de los Estados Miembros en la Junta Interamericana de Agricultura y en su Comité Ejecutivo, el IICA cuenta con una amplia presencia geográfica en todos los países miembros para responder a sus necesidades de cooperación técnica.

Los aportes de los Estados Miembros y las relaciones que el IICA mantiene con 12 Países Observadores Permanentes, y con numerosos organismos internacionales, le permiten canalizar importantes recursos humanos y financieros en favor del desarrollo agrícola del Hemisferio.

El Plan de Mediano Plazo 1987-1991, documento normativo que señala las prioridades del Instituto, enfatiza acciones dirigidas a la reactivación del sector agropecuario como elemento central del crecimiento económico. En función de esto, el Instituto concede especial importancia al apoyo y promoción de acciones tendientes a la modernización tecnológica del agro y al fortalecimiento de los procesos de integración regional y subregional.

Para lograr esos objetivos el IICA concentra sus actividades en cinco áreas fundamentales que son: Análisis y Planificación de la Política Agraria; Generación y Transferencia de Tecnología; Organización y Administración para el Desarrollo Rural; Comercialización y Agroindustria; y Salud Animal y Sanidad Vegetal.

Estas áreas de acción expresan, de manera simultánea, las necesidades y prioridades fijadas por los mismos países miembros y los ámbitos de trabajo en los que el IICA concentra sus esfuerzos y su capacidad técnica, tanto desde el punto de vista de sus recursos humanos y financieros como de su relación con otros organismos internacionales.

Son países miembros del IICA: Antigua y Barbuda, Argentina, Barbados, Bolivia, Brasil, Canadá, Chile, Colombia, Costa Rica, Dominica, Ecuador, El Salvador, Estados Unidos, Granada, Guatemala, Guyana, Haití, Honduras, Jamaica, México, Nicaragua, Panamá, Paraguay, Perú, República Dominicana, San Kitts y Nevis, San Vicente y las Granadinas, Santa Lucía, Suriname, Trinidad y Tobago, Uruguay y Venezuela.

Países Observadores Permanentes: Austria, Bélgica, España, Francia, Israel, Italia, Japón, Países Bajos, Portugal, República Arabe de Egipto, República de Corea y República Federal de Alemania.

PRESENTACION

El Sistema de Información para el Análisis de la Política Agraria en América Latina y el Caribe (SIAPA) constituye un instrumento fundamental en el análisis, la asesoría y el seguimiento de las políticas, en esfuerzos comunes, tanto para los profesionales del Instituto Interamericano de Cooperación para la Agricultura (IICA) como para las instituciones nacionales de los países miembros. La Base de Datos del SIAPA conjuntamente con las facilidades para su análisis y procesamiento de textos, permite una eficiente preparación de informes que abarcan un amplio rango de aspectos relacionados con la evolución de la agricultura en cada uno de los países de América Latina y el Caribe, o en un grupo de ellos.

Este Sistema fue diseñado y desarrollado por el consultor canadiense Thomas Kerr como parte de las actividades que se vienen realizando con la Agencia Canadiense para el Desarrollo Internacional (ACDI). Estas acciones, de acuerdo con las políticas y prioridades de ACDI, pretenden beneficiar a los países y regiones menos favorecidas en diferentes aspectos, tales como el fortalecimiento de la capacidad de análisis y asesoramiento en el diseño y manejo de los instrumentos prioritarios de la política de incentivos y los planes de inversión para la agricultura de los países de América Latina y el Caribe. Estas acciones se encuentran dentro del programa de trabajo del Proyecto Estrategias de Desarrollo Agrícola y Rural, a cargo de Jorge Torres Zorrilla.

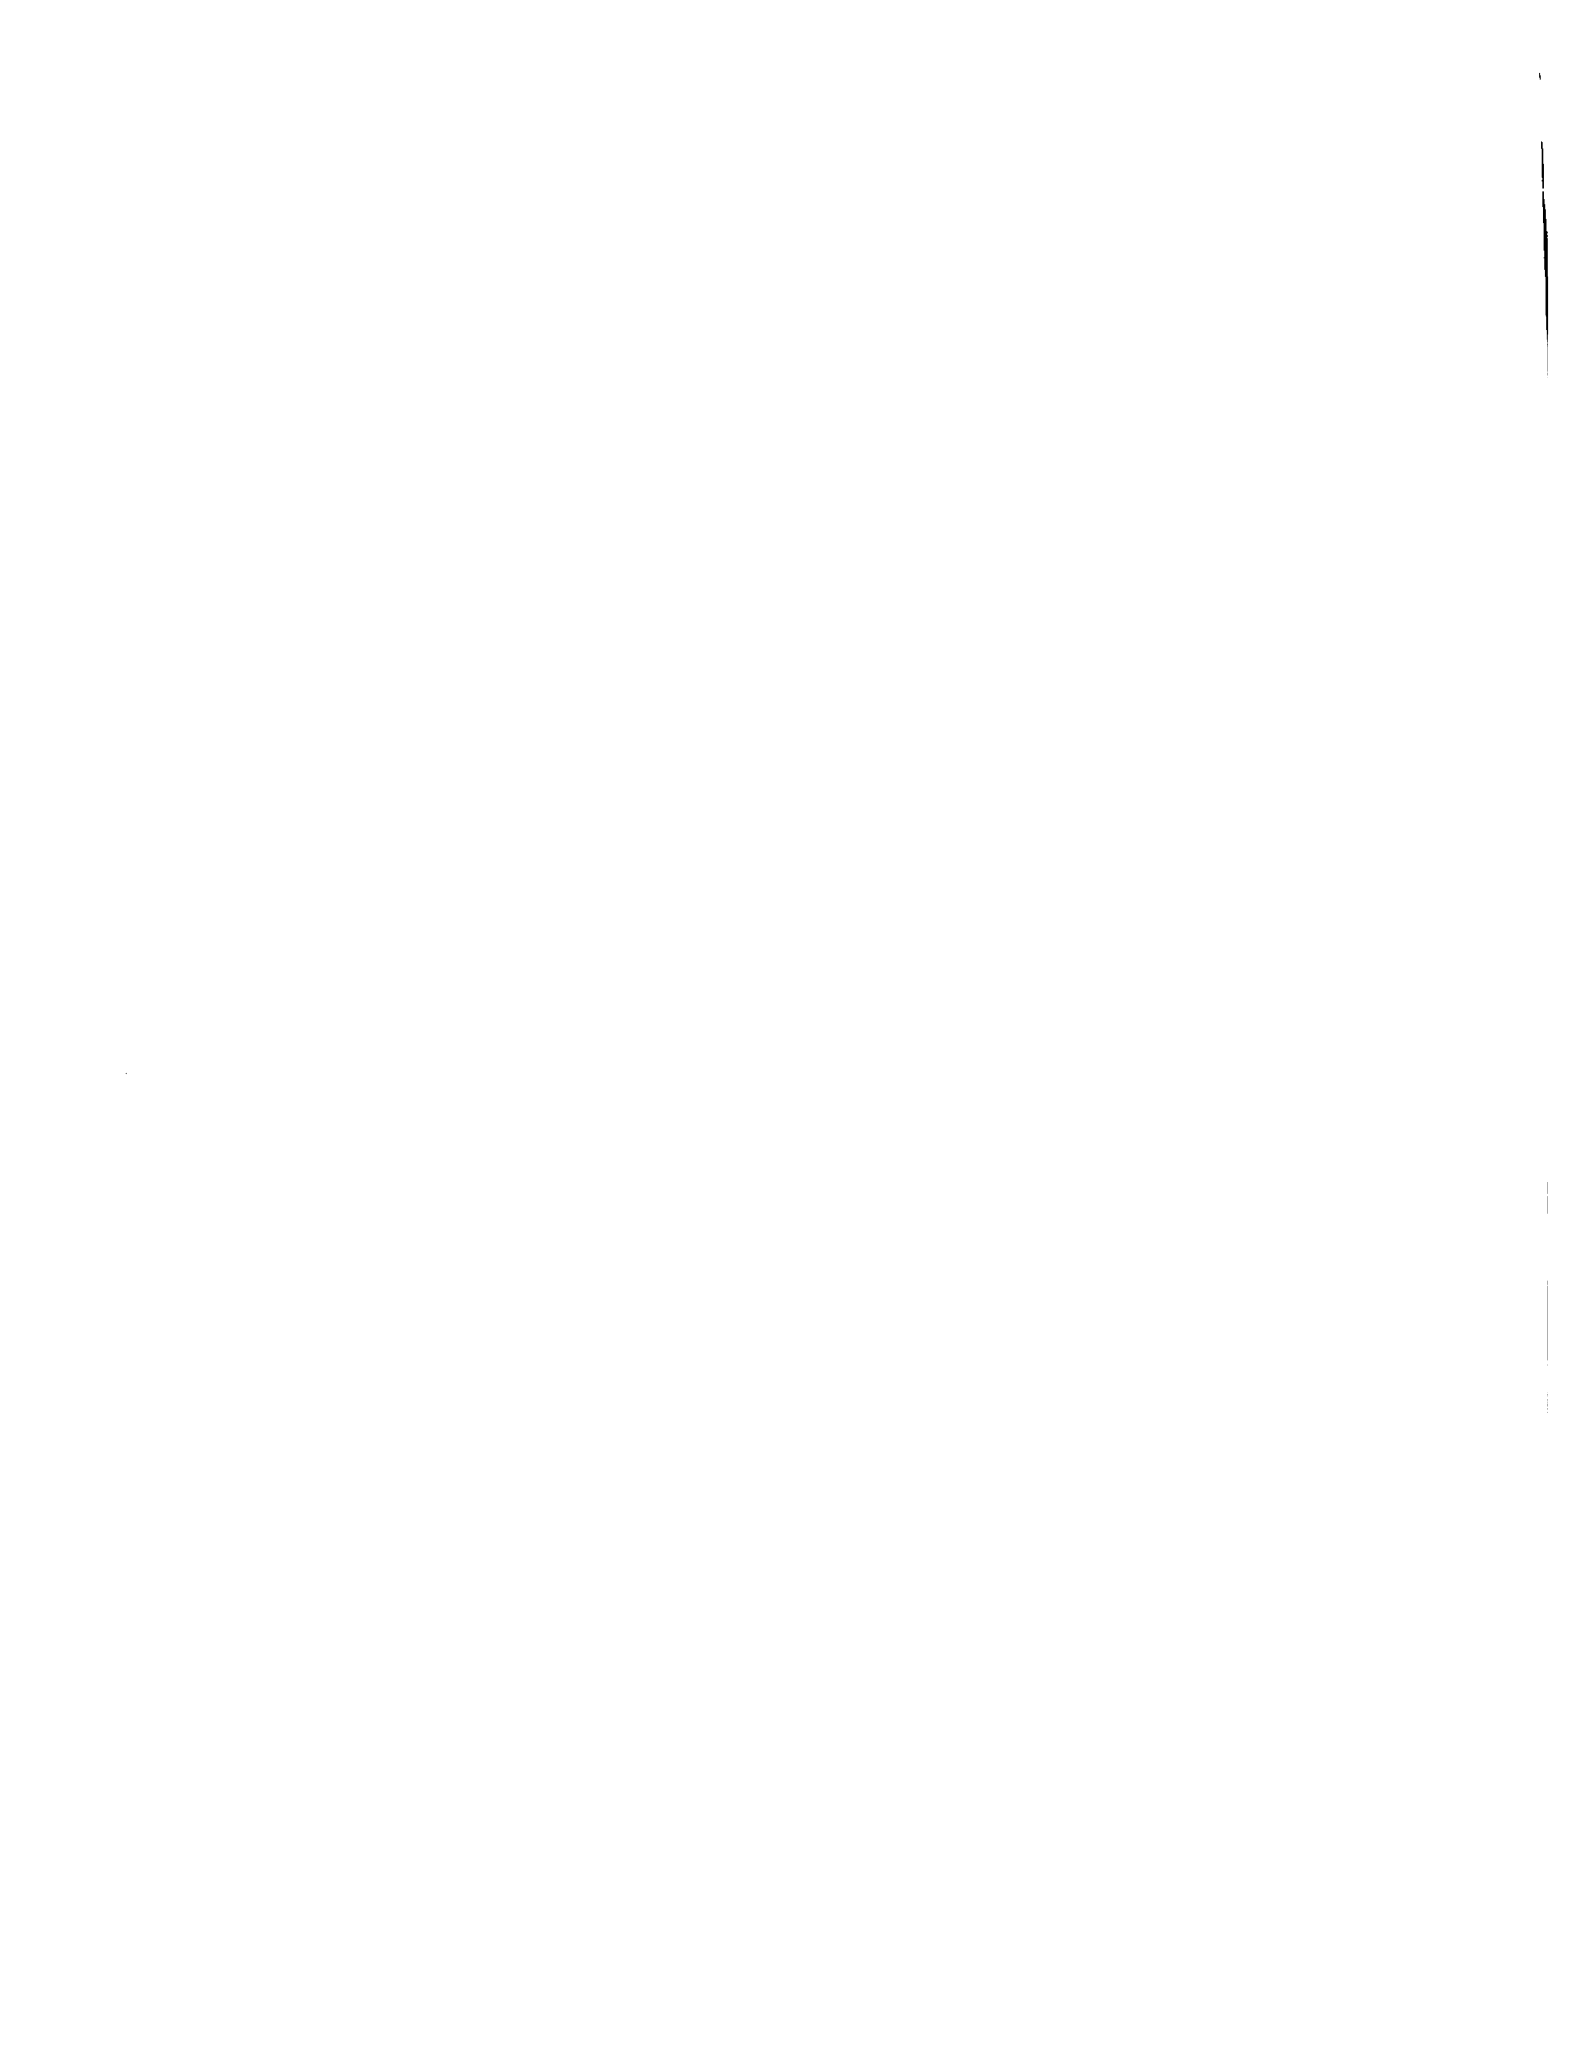

Para la preparación de la Base de Datos fue necesario, en primer lugar, diseñar una nomenclatura para las variables, de modo que permitiera su fácil reconocimiento. También fue necesario transformar la presentación de los datos para que pudieran ser fácilmente accesados por los paquetes de análisis utilizados por el Sistema. Por último, se prepararon archivos con una o un grupo pequeño de variables similares. Cada uno de estos archivos lleva un nombre que permite identificar las variables contenidas en él y su "extensión" especifica el tipo de archivo a que pertenecen la o las variables.

El Sistema cuenta con un mecanismo de ayuda *on line* que ofrece una descripción de las variables y unidades en que se encuentran disponibles. Este mecanismo de ayuda contiene la información del Diccionario SIAPA.

Este documento se preparó con el propósito de brindar al usuario del SIAPA una descripción detallada de variables y su localización dentro de la Base de Datos, y a la vez, facilitar el uso de la información disponible.

Tanto el proceso de preparación de la Base de Datos como este documento estuvo a cargo de Rosario Bogantes, de la Dirección del Programa I: Análisis y Planificación de la Política Agraria del IICA.

INTRODUCCION

El Sistema de Información para el Análisis de Política Agraria en América Latina y el Caribe (SIAPA) ha sido desarrollado por la Dirección del Programa I: Análisis y Planificación de la Política Agraria del Instituto Interamericano de Cooperación para la Agricultura (IICA) con la cooperación de la Agencia Canadiense para el Desarrollo Internacional (ACDI), con el afán de suministrar al personal profesional del IICA una herramienta de información estadística, de análisis y de procesamiento de texto. El Sistema consta de tres partes básicas, que están cuidadosamente vinculadas entre sí:

- 1. Base de datos
- 2. Programas para análisis de datos
- 3. Programas para procesamiento de textos

Con ello se proporciona gran agilidad y eficiencia en la preparación de documentos.

La Base de Datos ha sido organizada en dos grupos de variables: socioeconómicas y agrícolas. Para estos grupos la información está disponible en series de observaciones anuales, excepto para dos tipos de archivos los cuales también se presentan en forma trimestral (precios internacionales y tipos de cambio). La cobertura geográfica de la Base de Datos incluye:

- . Países de América Latina y el Caribe
- . Otros países en desarrollo
- . Países desarrollados (Japón, USA, CEE)

Es importante destacar que todos los archivos son del tipo ASCII y que contienen varias líneas o filas. Cada fila es un registro completo que comprende:

- . Nombre del país abreviado en tres letras (así, CRI = Costa Rica)
- . Nombre de la variable registrada en esa fila
- . Serie de observaciones anuales o trimestrales, dependiendo del archivo

Contenido de los grupos de variables:

a. Socioeconómicas:

La descripción del contenido de este grupo de variables aparece en los capítulos que van del I al XVI. Incluye las siguientes subdivisiones:^{1/}

- . National Accounts
- . Merchandise Trade
- . Balance of Payments
- . International Finance
- . Debt
- . General Economic Statistics
- . Government Finance and Expenditure
- . Deflators
- . Exchange Rates
- . Industrial Production

1/ El nombre de las subdivisiones se mantiene en inglés dado que es el idioma utilizado en la Base de Datos.

- . Socio-Economic Indicators ^{2/}
- . International Prices
- . Atlas Indicators (ATLAS)
- . Other Economic Indicators (WLD)
- . Population (POPLN)
- . Metals and Mining (MIN)

b. Agrícolas

La descripción del contenido de este grupo de variables aparece en los capítulos que van del XVII al XIX. Incluye las siguientes subdivisiones:

- . Some Agricultural Data:
 - Land Use
 - Agricultural Machine Use
 - Agricultural Machine Trade
 - Fertilizer and other Inputs
- . Value of Production ^{2/}
- . Food Consumption ^{2/}
- . Agricultural Production
- . Agricultural Trade
- . Direction of Trade (Total)

La mayor parte de los datos estadísticos proceden del Banco Mundial, de la Organización de las Naciones Unidas para la Agricultura y la Alimentación (FAO) y del Fondo Monetario Internacional (FMI). El sistema incluye procedimientos de actualización anual de la Base de Datos, la cual será enriquecida con contribuciones de los propios países miembros del IICA.

En cada uno de los capítulos de este Diccionario aparece, en primer lugar, el nombre del grupo de datos, seguido por las siglas de la dependencia y/u organismo fuente original de los datos. La primera columna contiene el nombre de la variable, la segunda su descripción y la tercera, el nombre del archivo donde se encuentra. Al final de cada capítulo aparece una lista de los elementos disponibles y las unidades para cada variable.

^{2/} Su descripción aparecerá en un Addendum de este Diccionario.
