**IICA Jamaica
Information Centre
Biblio 2000 - Library database.**

INTRODUCTION

The Inter-American Institute for Cooperation on Agriculture (IICA) Office in Jamaica has established an Information Centre to:

- ⇒ To provide access for members of the agricultural sector, researchers and students to agricultural information sources and resources located both in-house and externally via appropriate technologies;
- ⇒ To provide training opportunities in information technologies both at the professional and farmer levels;
- ⇒ To support the specific areas of the technical agenda of the Office. //

The IICA Office in Jamaica holds a considerable amount of documented information, valuable for research and training. There is a need to continue to make this information available to clients in the agricultural sector. The basis of all activities outlined in IICA's plan to support agricultural development in Jamaica is information and available access to it through the appropriate means. This activity will continue to maintain and develop facilities that provide necessary access to information that is much needed in the agricultural sector.

As part of this initiative, a bibliographic database of the holdings of the Information Centre, entitled *Biblio 2000*, has been created in Micro CDS/ISIS and is accessed in the windows version of this programme, Winisis. Included in the collection are monographs, reports, theses, studies, journals, reprints and other grey literature. The database provides information on the documents viz.: Conference, Title, Edition, Imprint, Collation, Personal author, Corporate author, ISBN/ISSN, Notes, Keywords, Classification number, Abstract, Journal title, Journal collation, Language of text, where these apply.

We are pleased to present you with an edited reference listing of the first 1000 records of *Biblio 2000*. The listing contains the following: Database number, Conference, Title, Author, Imprint, Journal Title/collation, Keywords. It is arranged by database number from 1-1000.

We are hopeful that the documents cited will be of value to you our partners and clients in agriculture and professionals in other fields. We are also hopeful that the database will be available on the Internet in 2000.
