FOREWORD

This Statistical Digest, represents a continuation of IICA's efforts to provide governments, research workers, business organizations and all those interested in economic trends in the OECS countries including the BVI with relevant statistical information. While some information on the macroeconomy has been included, the focus of the digest is on the agricultural sector of these OECS countries.

This digest includes time-series data on GDP, Agricultural Production, Consumer Prices, Trade, Credit, and where available, data on employment and wages. The data mainly covers information from 1980 to 1990, and in some cases up to 1992. Because the compilation of relevant statistics is not up to date, and in some instances, a complete series may not be available from one source, caution is advised.

The statistics presented in this digest have been provided mainly from the national Central Statistical Offices and Ministries of Agriculture in OECS member countries. In the absence of estimates from national sources, data drawn from regional and international statistical agencies have been included.

The data are presented in both tabular and graphical form for each OECS territory. The figures in most tables are rounded to the nearest decimal point, and in some instances to the nearest digit. With the exception of the Trade Dependency Index (TDI), the data contained herein will be familiar to most users. Introduction of the TDI in this publication provides the user with an additional statistic for assessing the performance of a country's foreign trade sector.

IICA is grateful for the co-operation it has received from the government departments as well as from the various private sector enterprises that provided the data needed to complete this publication. An electronic (diskette) copy of this publication (tabular information only) may be made available upon request. All suggestions or corrections regarding any discrepancies or inconsistencies with the data contained in this publication will be gratefully appreciated.
